3QE PROJECTOR, FLOODLIGHTS, WALL WASHER

– Luminaire Arrangement:

Projectors

Narrow spot, Spot, Flood

Accentuation

The ideal angle of tilt (α) for accent lighting with 3QA projectors is around 30° . This emphasizes the three-dimensionality of architectural details, sculptures or trees, without distorting the spatial impression with excessive shadowing.

Arrangement: $\alpha = 30^\circ$

Floodlights

Wide flood, Extra wide flood

Wash lighting

3QA projectors ensure uniform floodlighting of walls surfaces or trees. The ideal angle of tilt (γ) for this is around 30° .

Arrangement: $\alpha = 30^\circ$

Lens wall washers

Wall wash

Wallwashing

Uniform vertical illuminance in the outdoor area defines spatial borders. Here, the distance (a) of 3QA lens wallwashers from the wall should be around one third of the room height (h). This results in an angle of tilt (γ) of approx. 55° .

Arrangement: $a = 1/3 \times h$ bzw. $\gamma = 55^\circ$

For good longitudinal uniformity, the spacing (d) of 3QA lens wallwashers may be up to 1.2 times the offset from the wall (a).

Arrangement: $d \leq 1.2 \times a$

OPTIONAL EXTENSIVE MOUNTING ACCESSORIES:

Note: These lighting accessories enables the luminaire with soft light or anti-glare light output.
